

SUEZ.scope™

expert advice
when you need it

fresh thinking

We're a team of experts who identify and analyse waste in your business — saving you time, resources and money.

- To do this, we:
- ▶ Talk to employees, customers and suppliers
 - ▶ Study your data
 - ▶ Consider waste in the whole of your business

And then we recommend improvements.

We're committed to helping you take a fresh look at ways to improve the management of your waste and sustainability projects.

It's not just waste in the bin — think wasted movements, wasted time, wasted opportunities. We will work with you to generate insights across your value chain, from procurement to design, that will bring savings and peace of mind.

Let SUEZ.scope rethink your waste procurement and help you make the right decisions when choosing waste management suppliers. Our customers tell us this is especially useful to them when negotiating new contracts.

Our methods are simple, effective, tried and tested.

Our first step is always to listen closely to you and your team. You know best where the problems may lie. We can help you identify the opportunities to improve, without disrupting your systems, breaking your budget or compromising compliance.

Depending on the complexity, we'll also get the views of other employees, your customers and we'll talk to your suppliers too, to make sure they're giving you the best service.

Then, we'll study your data. We use a range of data analytics to identify the obvious and not-so-obvious opportunities to ease the flow and boost efficiency.

what we do for you

Your needs can vary throughout the year.

That's why we offer a scaled service – waste **audits**, a **hotline** to answer a quick query on the latest regulation and a **bespoke consultancy** for long-term strategy development.

AUDIT

In-depth, systematic analysis

- ▶ Boost operational efficiency by ensuring your waste and water services meet the needs of the business within budget.
- ▶ Make sure your waste and water services don't disrupt your core business – by creating sustainable solutions that meet operational needs.
- ▶ Ensure value for money by providing a lean operational solution to benchmark tenders.
- ▶ Improve waste minimisation and recycling performance in an innovative, commercially-realistic way.

A recent SUEZ.scope audit of a large UK food manufacturer identified over 10% savings on waste management costs and improved recycling, logistics and site appearance.

HOTLINE

Expert advice,
just a call away

- ▶ Reduce compliance risks with instant, informed advice.
- ▶ Get quick, clear intelligence on practical solutions to challenging, high-risk or high-value waste streams.

BESPOKE CONSULTANCY

People who really
know their stuff

- ▶ Benchmark to set the right recycling target, waste reduction goals and the next areas to improve – always cost-effectively.
- ▶ Set and communicate your long-term waste strategy with impressive and achievable goals.
- ▶ Use lifecycle analysis to ensure design that reduces waste.

SUEZ has a close consultancy relationship with L'Oreal, globally supporting their waste, water and energy reduction goals.

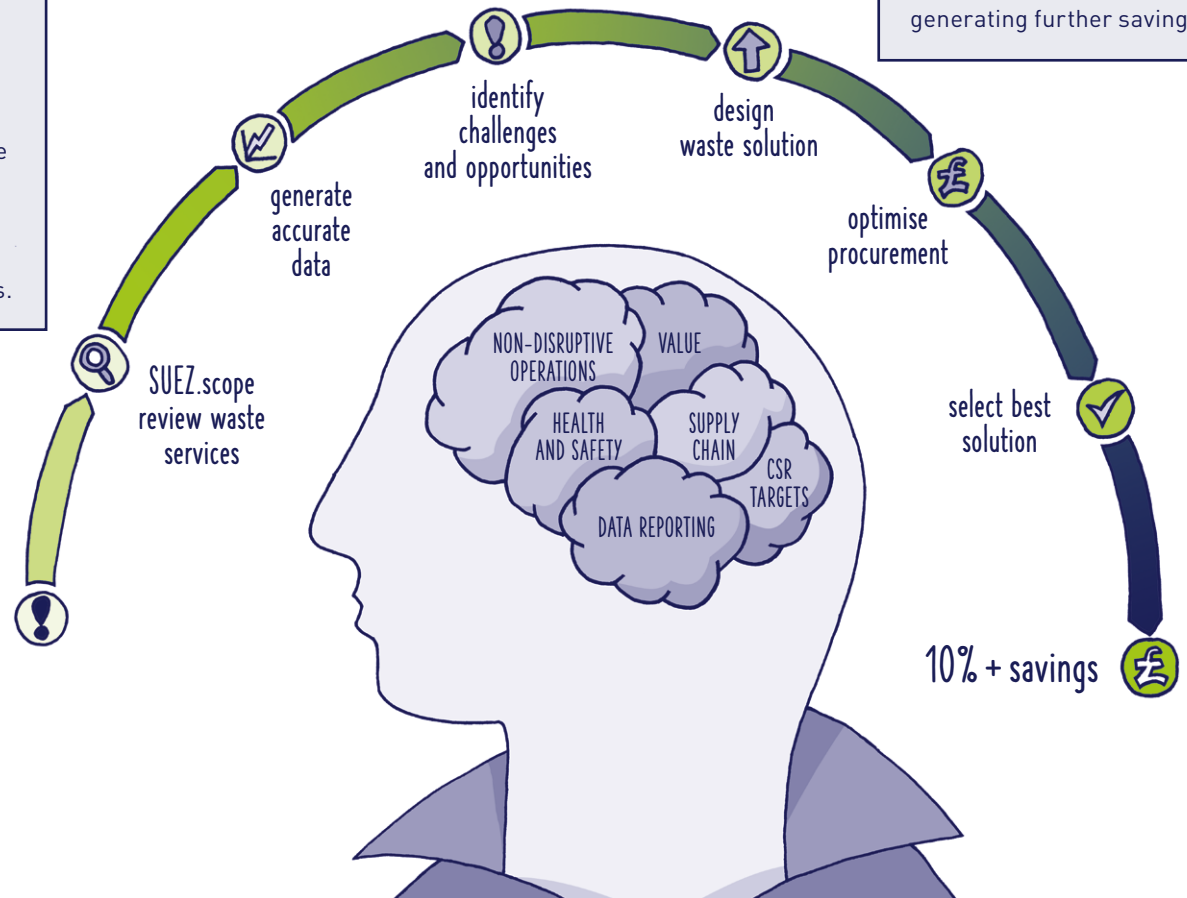

We recommended ice pigging to reduce liquid waste, consolidating waste movements to reduce transport and mapping waste flows to generate accurate data for L'Oreal, its suppliers and customers.

rethinking waste procurement

Tendering processes can save you 3-5% on your current costs.

SUEZ.scope could **save you 10% and more.**

SUEZ.scope supported Reposal – Wilsonart in Germany with a waste service review. Our analysis identified key opportunities to better manage high-value waste streams. As well as improving recycling and commercial return from materials, we offered solutions to enhance internal logistics, generating further savings.

I'm really looking forward to talking to you about how our fresh thinking can help you.
